

Polarfeed develops, produces and markets feed solutions for the aquaculture and fish farming business. The company's main office is situated in Lofoten, while the production facilities are located in Øksfjord in Finnmark County.

Polarfeed is part of the Nordly Holding Group with associated companies in fields such as fish health products, product development, production of fillet and canned products and logistics. The turnover of Nordly Holding AS surpassed 500 million NOK in 2008 and the Group aims to double this in 2009. Polarfeed is growing fast and we require several skilled new co-workers to further strengthen the company.

We will be attending the work fair in Reykjavik 27-28th February and look forward to meeting you there.

Product developer fish feed

Job description

Based on a thorough understanding of the market as well as your own expertise you will develop the company's products according to the requirements and needs of our clients. Important tasks include raw material assessment, development of solutions for salmon, trout and cod, as well as knowledge base for the fish farmer. Contribute to profit growth through expertise and personal qualities.

Qualifications

University degree with emphasis on fish nutrition /fish health. Experience from aquaculture or fish farming industry and/or fish feed industry would be a considerable asset.

Personal qualities

You are hard-working and have good communication and social skills. You enjoy working independently; you are responsible and solution-minded.

We offer

An exciting and challenging position in a company that develops quickly in the right direction. Our working environment is fast-paced and dynamic with a strong emphasis on development which gives room for your creativity and your positive input. Competitive remuneration package. The Product Developer will be based primarily at the main office in Leknes, alternatively at the office of one of our subsidiaries elsewhere. Some travel required.
